August 21, 2014

**Bid or Expiration Date:**

NA

**Company:**

On Call Services

**Amount of Quote or Bid:**

\$26,300

**Recommended Quote or Bid:**

On Call Services

## General Information:

This purchase is for the replacement of the triple wave slide at Adventure Peak. This project is an approved CIP project for 2014. The replacement includes removal of existing structure and installation of new framing, mounts, and three compartment fiberglass open slide. For safety, it also includes side curtain containment, a landing pad and a new entrance panel which provides a safety feature that the current slide does not have. This is one of the most popular events in Adventure Peak because multiple children/adults can ride at the same time.

The triple wave slide is an original feature to the play structure and is 12 years old. The useful life on most amenities is 10 years, so it has exceeded its life expectancy. Due to its ongoing popularity, the fiberglass on the slide is badly worn in several areas and despite numerous repairs, it is becoming much more difficult to maintain.

Last year, Adventure Peak had more than 125,000 paid admissions for children. This does not include adult visitors, as they are free with a paid admission. This triple wave slide is an outstanding feature that easily accommodates the extremely high volume of visitors and provides a thrilling ride for guests of all ages.

Due to the highly specialized nature of this construction, there is only one provider to do this type of work and ensure it is compliant with all safety and liability requirements. On Call Services provided a team for the initial installation of Adventure Peak in 2002. The city has maintained a preventative maintenance and service agreement with On Call Services for the past 12 years. On Call Services has completed all major repairs, upgrades and new installations for the play structure.
